Installation

10 Place back window on an appropriate support with its convex surface facing down.

11 Install rubber frame on back wondow.

12 Install ornamental frame in rubber frame.

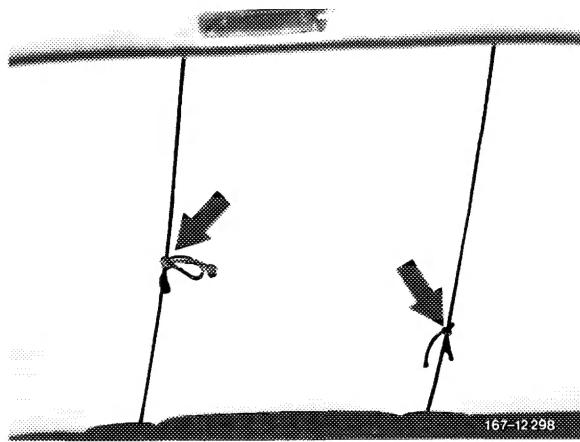

Note: Prior to mounting cover, fill upper joint of ornamental frames with MB window sealing compound so that no water can flow under cover over back window.

R-3499

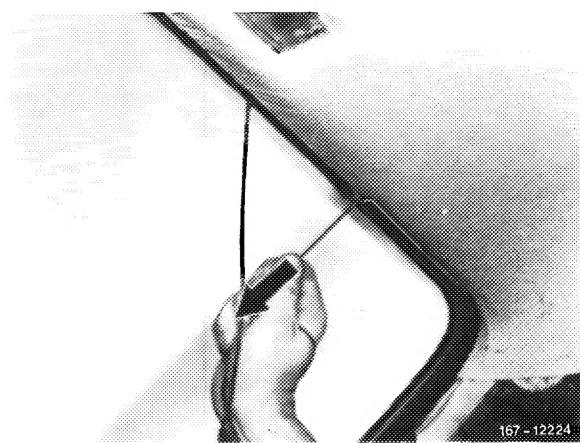

13 Place two lubricated cords in holding slot of rubber frame and rub in rubber frame with glycerine or talcum powder.

14 Install pre-assembled back window with rubber frame in window opening from outside and align.

15 Apply light pressure against back window, while at the same time a helper on inside of car lifts sealing lip of rubber frame over spot welded flange of window opening by pulling out the cord, starting at the bottom.

Note: Pull off cord parallel to window glass, to prevent damage on rubber lip.

16 Make seal between glass and rubber frame as well as body and rubber frame with MB window sealing compound, Part number 001 989 31 20.

17 Continue installation in reverse of removal.

Note: Excessive sealing compound can be removed with adhesive tape.
